Business Continuity Planning & Disaster Recovery Solutions

with OnX Managed Services, Inc.

Christian Brothers Services (CBS) is a full service provider, which offers a wide-range of products and services to assist any size organization in improving its utilization of information technology. We maintain website design & development and IT operations teams with decades of combined experience. We can help find the right mix of products and services to meet your requirements so you can focus on your own organization's mission.

Diverse Wireless Internet Service

with Business Only Broadband, Inc.

" We implemented BOB wireless Internet access in addition to our wired Internet access to increase bandwidth and gain diversity of carrier and topology to ensure we can always get to the Internet 100 percent of the time."

Eric Thompson,
*Director of Information
Technology, Church of the
Brethren Benefit Trust*

Christian Brothers Services (CBS) understands the Internet serves many important purposes at your location, from accessing the web and phones, to social media posting and 1:1 computing. With this in mind, we have partnered with Business Only Broadband (BOB) to offer state-of-the-art, 100 percent Carrier-Grade Metro Ethernet and Internet-over-Ethernet Solutions for today's mission-critical data networking needs.

BOB has the experience, technology and the ever-growing bandwidth requirements your location may have. They are also E-Rate certified (SPIN 143031801) and connected to the Illinois Century Network (ICN).

BOB's network features include:

- More bandwidth for less
- 100 percent wireless – no waiting for buried utilities
- Largest fixed-wireless broadband networks in the Chicago, Milwaukee and New York/New Jersey metro areas
- Largest Ethernet, wireless and Cisco technology deployed
- Scalable bandwidth from 1Mb to 300 Mb for instant upgrades to satisfy new long/short-term needs
- 24/7/365 network monitoring and management

Business Only Broadband 

Hosted & On Premises Telephone Systems & Data Network Security

with CCC Technologies, Inc.

ConvergeConnect® Hosted VoIP Service from CCC Technologies provides the same robust features and functionality as the high-end, on-premise IP PBX solutions without the expense of equipment and staff to maintain the equipment. Leverage the latest VoIP technology by replacing multiple phone and fax lines with voice service that rides over your existing Internet connection. Solutions for today's mission-critical data networking needs.

Advantages include:

- A scalable, fully-managed flexible solution that adjusts as your organization adjusts
- A simple web-based management tool that provides both system management and end-user customization

Avoid purchasing equipment that can quickly become obsolete while also providing for feature upgrades as they become available.

CCC Technologies offers:

24 / 7 / 365 Monitoring and Support: The dedicated Customer Support Unit (CSU) Engineers will work to resolve issues before you know they even exist.

Reporting: Comprehensive reports allow visibility of your risks, as well as employee productivity.

Automated Notification: Keep informed on the status of your network 24 / 7 / 365. Receive an email notification when we detect an outage, security risk or other acceptable use violation.

Security Policy/Change Control Management: CCC Technologies understands the critical and sometimes sensitive nature of changes to infrastructure, and will provide you with a moved, add, changed and delete process to effect necessary changes in the most effective manner by highly skilled security professionals.

CCC Technologies, Inc.

Communications & Mobility Review Service

with Eclipse Telecom, Inc.

Are your communications and mobility infrastructure, services and agreements aligned with your actual usage and overall communications goals? Don't let deciphering telephone and Internet service provider invoices and government tariffs and rules become a challenging task that takes up all your free time – consider utilizing the services of a telecommunications “telco” expert.

Christian Brothers Services (CBS) faces the same challenges as your company, and recommends professional service provider Eclipse Telecom, Inc. to help you navigate the telco maze. Eclipse Telecom, Inc. can help your organization reduce costs and put together a solid telecommunications plan by reviewing your communications and mobility infrastructure, services, expenses, usages and goals.

Reduce Your Operating Expenses

Eclipse Telecom, Inc. understands nonprofit organizations like yours, and can use that to your advantage with providers. With this service, Eclipse Telecom, Inc. will only invoice you for their services (50 percent of first year savings) if they are able to create savings for you by reducing your actual expenses. If they are unable to reduce your expenses, you pay nothing. When they do reduce your expenses, you begin saving money immediately in the first year, and even more in subsequent years.

Not only can Eclipse Telecom, Inc. provide one-time assistance, they can provide complete Telecom Lifecycle Management on an ongoing basis to ensure your infrastructure, services and expenses continually stay in alignment with your organizational goals.

Business Continuity Planning & Disaster Recovery Solutions

with OnX Managed Services, Inc.

Christian Brothers Services (CBS) has partnered with OnX Managed Services, Inc. to help ensure your organization's business continuity. Minimize investment and expense with a fully customized disaster recovery (DR) solution or enhance your backup and recovery plan. Services from CBS and OnX Managed Services, Inc. work together to fill the gaps in your data recovery plan, and offer your organization a high-level partner to manage, implement and routinely test your data recovery program.

Services include data backup, data replication, data recovery and managed testing – all vital to achieve your RTO (recovery time objective) and RPO (recovery point objective). Most important – there are no cookie cutter solutions – solutions are customized to your needs.

Design

A sound DR plan should sustain critical elements of your business in the event of a disruption.

Implementation

Implement your data recovery and disaster recovery system on-site, at an alternate facility, or hosted from one of OnX's Tier III, SSAE 16-certified data centers.

Managing, Testing and Support

Rigorous, routine testing validates your data recovery plan so that you know your system is proven to work, supported by documentation to support your compliance requirements.

If you need to establish a disaster recovery plan, CBS, along with OnX Managed Services, Inc. are ready to work for you!
