## Smart90

### *Smart90 Prescription Drug Program*

Christian Brothers Employee Benefit Trust (CBEBT) members on long-term medications may fill two 30-day supplies of their long-term prescriptions, after which they are charged 100% of the drug's cost. To avoid that cost, EBT members must switch to a 90-day supply.

CBEBT members now have two options to receive their 90-day supply of medications. Members can continue to have the medications delivered directly to their homes by mail from the Express Scripts home delivery pharmacy or pick them up at a retail pharmacy through the new Express Scripts Smart90 Program.

### *What is the Smart90 Program?*

The Smart90 Program allows CBEBT members to fill a 90-day prescription at any of more than 8,000 Walgreens pharmacies (or its affiliates) nationwide. The program gives members an option if they would rather pick up their medications from a pharmacy than have them delivered through the mail.

#### **The Smart90 Program is...**

- **Fast**—Instead of waiting for mail-order prescriptions to arrive, CBEBT members can simply go to their nearest participating Walgreens (or affiliate) pharmacy and pick up their medications.
- **Economical**—CBEBT members still pay the same low price if they opt to pick up their maintenance medications at a local pharmacy instead of mail order.
- **Convenient**—Mail-order or local pickup, members choose what works best for them.

Members also have 24/7 web and mobile tools to help them manage prescription costs and locate Smart90 participating pharmacies at [cbservices.org/health-smart90.html](http://cbservices.org/health-smart90.html)

### *How Smart90 Works*

Members who currently use the Express Scripts home delivery pharmacy and want to switch to the Smart90 Walgreens Network will need to get a new prescription from their physician and bring it to a participating Walgreens Network pharmacy.

Present the 90-day prescription(s) to the pharmacist.

Pay the same 90-day co-pay as you would to fill your prescription using ESI's mail order pharmacy.

For new prescriptions, you simply need to ask your medical provider for a 90 day supply.

### *Giving Members Options*

The Smart90 Program gives CBEBT members the choice of what works best for their needs.

Whichever option they choose, members are assured of receiving affordable, high-quality care. Both Smart90 retail pharmacies and the Express Scripts home delivery pharmacy can aid members in prescription transfers, contact physicians if needed, and have one-on-one conversations when clinical questions arise. The Express Scripts Contact Center and online chat feature allow CBEBT members to ask pharmacists questions anytime, from anywhere.

If you're wanting to switch from ESI home delivery to the Walgreens Smart90 Program, simply bring your current prescription bottle(s) to the Walgreens of your choice and they will be able to transfer your 90-day prescription to that pharmacy.
